FOR IMMEDIATE RELEASE

PACIFIC PACKAGING MACHINERY, INC. WILL EXHIBIT AT PACK EXPO LAS VEGAS

COVINA, CA. AUGUST 1, 1999 – Pacific Packaging Machinery Inc, the leader in high speed volumetric liquid packaging fillers, today announced that they will introduce their newest filler technology at Pack Expo 1999 on October 18th – 20th at the Sands Expo and Convention Center.

Pacific will be demonstrating a fully operational 18 station rotary volumetric filler that supports speeds up to 250 containers per minute (**Booth # 2049**). The filler incorporates Pacific's tool-less Universal Change Part technology that supports a myriad of container sizes and shapes. This technology is extremely easy to use and reduces container changeover time to less than 15 minutes. The filler on demonstration will support containers that range from 4 to 32 ounces.

The filler will be configured with a touch screen operator interface and is available to operate with either mechanical drives or servomotor drives. Non-deteriorating filling accuracy is guaranteed from Pacific's Rotary Timed Orifice technology in conjunction with their zero-drip filling valves. The bottom fill valves automatically open and close to provide a drip-less filling environment. As with many Pacific components, the filling valves do not require tools.

Gerald Carpino, Pacific Packaging President, states, "Similar to our first 38 years of building quality liquid fillers, as we approach the new century, we remain extremely focused on designing new features to meet the changing needs of the market. Our latest generation filler incorporates a number of new technologies that correspond to performance, accuracy and ease-of-use."

Pacific fillers are capable of filling any liquid product regardless of the viscosity. Products can range from alcohol and oil to extremely viscous products such as peanut butter. Given the liquid product flexibility, a Pacific filler is applicable in a number of industries including foods, personal care, pharmaceutical, household care and automotive

About Pack Expo Las Vegas 1999

Pack Expo Las Vegas 1999 will feature 600 exhibitors and will be the showcase for the latest innovations and state of the art advances in packaging machinery, materials, containers, packages, software, components, fabrication, robotics, and design systems.

Over 16,000 packaging professionals from the U.S. and other countries around the world will attend the show.

For information on Pack Expo Las Vegas 1999 contact: PMMI, 4350 N. Fairfax Drive, Suite 600, Arlington, VA 2203; Telephone: (703) 243-8555; Fax: (703) 243-8556. Visit their web site at www.packexpo.com or call their toll free fax-back hotline at 800 585-8098.

About Pacific Packaging Machinery, Inc.

Pacific Packaging Machinery, Inc, based in Covina Park, California, provides industry leading filler packaging products that assist the world's major corporations to attain competitive advantage. Founded in 1962, Pacific Packaging is widely recognized as the packaging leader for custom high-speed volumetric liquid fillers for all product viscosities. Pacific designs and manufacturers extremely accurate and durable fillers for low viscous products such as alcohol to highly viscous products such as peanut butter. Pacific's personalized and custom engineering, innovative research and development, in-house manufacturing and superior customer service enable the company to be at the forefront of major packaging areas including foods, beverages, personal care, pharmaceutical, household care and automotive.
